Ms. Barbare:

In accordance with the Coal Combustion Residuals (CCR) Rule, 40 CFR 257 Subpart D, Rawhide Energy Station has worked with AECOM on groundwater monitoring activities. As discussed in previous correspondence, Platte River worked with AECOM to initiate an assessment of corrective measures for Cobalt at the bottom ash transfer (BAT) impoundments. This ACM was prepared in accordance with 40 Code of Federal Regulations (CFR) Parts 257.96 and 257.97 requirements under the Coal Combustion Residuals (CCR) Rule. In addition, U.S. Environmental Protection Agency (EPA) guidance documents (EPA 1993; EPA 2000) were used the assessment of corrective measures.

This assessment of corrective measures has been completed. Platte River and AECOM are discussing this assessment and will initiate next steps.

Please contact us with any questions you may have.
